Education

Dr. B.C. Roy Engineering College, Durgapur B.Tech in Computer Science & Design Relevant Courses: Data Structures, Algorithms, DBMS, Software Engineering	2022 – 2026
G.D. DAV Public School, Deoghar Higher Secondary Certificate	2020 – 2021
G.D. DAV Public School, Deoghar Secondary School Certificate	2018– 2019

Technical Skills

Programming: C, Java, Python, Kotlin
Web Development: HTML, CSS, JavaScript
Android Development: XML, Kotlin, Firebase
Machine Learning: NLP, TensorFlow, Scikit-learn
Tools: Git, Figma (UI/UX), VS Code
Problem-Solving: Data Structures, Algorithms

Projects

Spam Email Classifier (Click Here)	December 2024
Developed an AI-powered spam detection tool using Natural Language Processing and machine learning. Integrated with a Streamlit UI, the model accurately classifies emails into spam and non-spam categories, enhancing email security and user productivity.	
Screen Blur Extension (Click Here)	December 2024
Created a Chrome/Edge browser extension that allows users to blur or unblur specific sections of a webpage. Helps protect sensitive information during screen sharing, recording, or live presentations.	
Tapa-Tap Android Game (Click Here)	November 2024
Designed a fast-paced Android game featuring random tap events, score tracking, a countdown timer, and a dynamic leaderboard. Enhances user engagement through competitive gameplay.	
Guide (Click Here)	October 2024
Built a modular Kotlin-based Android template for creating structured, content-driven guide apps. Focuses on clean UI/UX design and scalability for efficient app development.	

Work Experience

Intern, TechSaksham Program	December 2024
Completed an AICTE-approved internship on transformative learning, focusing on Flutter and AI integration. Gained hands-on experience in mobile app development and AI-driven solutions, contributing to real-world projects and enhancing technical skills. View Certificate
